ISIN : LU1209227344 - This share class is offered to investors who invest at least 10 000 000 EUR during a period of three months starting as from the date of the launching of the share class.

A Sub-Fund of OFI FUND umbrella SICAV. The SICAV's Management Company is OFI LUX

The Sub-Fund is managed by OFI Asset Management

Objectives and investment policy

Investment objective and policy

The objective of this Sub-Fund is to outperform its reference benchmark the Stoxx Europe 600 Net Return by investing in quoted equity securities of companies, domiciled and listed in Regulated Markets or Other Regulated Markets within the European Economic Area and the United Kingdom. To that end the Sub-Fund will select socially responsible companies with good performance outlook and which are engaged with their stakeholders such as employees, suppliers, clients or governments. The Investment Manager will be bound by these investment criteria.

In order to achieve its investment objective, this Sub-Fund will base its investments on fundamental financial and extra-financial research in the selection of individual securities for long term positions.

The consideration of material ESG issues is incorporated into the investment analysis and decision-making processes in order to better assess investment opportunities and manage risk with a view toward generating sustainable, long-term returns. ESG refers to environmental, social and governance factors relevant to an investment which may have a financial impact on that investment and affect the performance of a portfolio (to varying degrees across companies, sectors, regions, asset classes and over time). Examples of ESG factors include: carbon emissions, water scarcity, waste management.

Simultaneously, the Investment manager shall only select stocks targeting positive social impact. Social impact shall be measured through a social impact scoring based on 5 criteria: Mission, Workforce, Social Progress, Added Value breakdown and Social Inclusion. To that end, the Investment Manager shall exclude from the Eligible Investment Universe of the Sub-Fund the 20% of equity securities which do not have the best social impact ratings compared to the other equity securities which have been selected, and shall monitor this 20% ratio on a daily basis.

Investors should be aware of, and prepared to accept, that for Sub-Funds that have a sustainable management process, this process is based on using a proprietary model to determine ESG scoring. There is a risk that this model is not efficient. The performance of those Sub-Funds may therefore be below the management objective.

Management Discretion

The Sub-Fund will be actively managed and the Investment Manager has the discretion to buy and sell investments on behalf of the Sub-Fund within the limits of the investment objective and policy.

The Sub-Fund will use the Benchmark index Stoxx Europe 600 Net Return as a reference benchmark. The reference benchmark will be used as an indicator to measure past performance of the Sub-Fund and in the calculation of outperformance fees.

It is expected that equity securities within the Sub-Fund may be components of the reference benchmark, however to determine the portfolio composition the Investment Manager has full discretion in relation to the individual or sectorial weightings of the equity securities that are components of the reference benchmark. The Investment Manager will also use its full discretion to invest in companies or sectors not included in the Benchmark in order to take advantage of specific investment opportunities.

The investment strategy implies that the portfolio holdings may deviate from the reference benchmark. This deviation may be significant and is likely to be a key element explaining the extent to which the Sub-Fund can outperform the Stoxx Europe 600 Net Return (ticker Bloomberg SXXR Index).
