OFI FUND – EURO BREAKEVEN INFLATION (I-XL-C EUR)

ISIN: LU0648430014 - This share class is offered to institutional investors

A Sub-Fund of OFI FUND umbrella SICAV

The SICAV's Management Company is OFI LUX

The Sub-Fund is managed by OFI ASSET MANAGEMENT

Objectives and investment policy

Investment objective and policy

The objective of this Sub-Fund is to outperform its reference benchmark the Markit iBoxx Breakeven Euro-Inflation France, Germany & Italy Index by investing in fixed income securities, e.g. bonds and inflation indexed bonds, issued by governments, of Eurozone countries, listed or dealt in on Regulated Markets or Other Regulated Markets and denominated in Euro.

The Sub-Fund's policy is to take advantage of future rising inflation rates without providing exposure to real interest rates by implementing a breakeven inflation strategy. The break-even rate is applied to bonds and refers to the difference between the yield on a nominal fixed-rate bond and the real yield on an inflation-linked bond (such as a Treasury inflation-protected security, or TIPS) of similar maturity and issuer.

At least 80% of the Sub-Fund's net assets shall be regularly invested in Euro denominated inflation-indexed fixed income securities, in principle of maturities between 5 and 20 years, issued by governments of the Eurozone. The Investment Manager may however invest at its sole discretion in instruments of shorter or longer maturities. The average rating of these fixed income securities will remain investment grade and will be in the range of the ratings of France, Germany and Italy.

The Sub-Fund may also hold cash or cash equivalents up to 20% of its net assets.

Management Discretion

The Sub-Fund will be actively managed and the Investment Manager has the discretion to buy and sell investments on behalf of the Sub-Fund within the limits of the investment objective and policy. The Sub-Fund will use the Benchmark index Markit iBoxx Breakeven Euro-Inflation France, Germany & Italy Index as a reference benchmark. The

reference benchmark will be used as an indicator to measure past performance of the Sub-Fund and in the calculation of outperformance fees.

It is expected that equity securities within the Sub-Fund may be components of the reference benchmark, however to determine the portfolio composition the Investment Manager has full discretion in relation to the individual or country weightings of the fixed income securities that are components of the reference benchmark.

The investment strategy implies that the portfolio holdings may deviate from the reference benchmark. This deviation may be significant and is likely to be a key element explaining the extent to which the Sub-Fund can outperform the Markit iBoxx Breakeven Euro-Inflation France, Germany & Italy Index (ticker Bloomberg IBXXBK13 Index).

Purchase, redemption and conversion

You can buy, sell and convert this Share Class from the Registrar and Transfer Agent or the Principal Distributor on a daily basis (on any Dealing Day, i.e. on which banks in Luxembourg are open for banking business).

Distribution policy

Recommendation

The Sub-Fund is suitable for investors considering an investment in assets of both a conservative and risky nature. Although potential losses of the Sub-Fund are expected to be moderate, the investor should however be able to accept temporary losses.

Risk and reward profile

This indicator is based on an estimate of the historic volatility calculated from weekly performances of the benchmark over a period of five years. This indicator is based on an estimate of the historic volatility calculated from weekly performances of the benchmark over a period of five years. This Share Class is classified in category 3 because at least 80% of the Sub-Fund's net assets shall be regularly invested in Euro denominated inflation-indexed fixed income securities, in principle of maturities

between 5 and 20 years, issued by governments of the Eurozone having sensitivity to the real interest rate varying between -0.5 and 0.5.

Further risks that are essential for the Sub-Fund are not adequately covered by the indicator above: (i) the Sub-Fund is exposed to risks linked to the use of derivative instruments in particular futures, options, swap agreements and currency forward contracts.

Furthermore, (ii) the value of your investment may fall as well as rise and you may get back less than you originally invested.

The historical data used for calculating the risk and profit category cannot serve as a reliable indicator of the future risk profile.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

The lowest risk category does not mean a free-risk investment.

There is no capital guarantee and no capital protection.

You can find further information concerning the risk and reward profile on the SICAV's prospectus available at OFI LUX or on the Internet site of the Principal Distributor at www.ofilux.lu
